

Rajani FASD Assessment & Diagnostic Clinic Training Services

LINKS: A Newsletter for Alberta FASD Diagnostic Clinics

As we shift from summer and go into fall and winter, there is unknown territory ahead as clinics prepare for winter scheduling. Over the past months, coordinators have adjusted how they interact and provide services, modify schedules and have used virtual and other models of completing assessments and diagnosis. There are so many telehealth and online options to get work done while remaining off-site from your office building and to connect safely with other team members, clients and staff. The advantages of having Zoom, Teams meetings, video conferencing and other means of communicating, without being face-face, enables clinics to continue to provide services. Many coordinators I've spoken to have embraced the challenges of doing things differently. There are efficiencies, cost and human resources savings and clients' satisfaction with the adjustments to the extent clinics will continue with different ways of delivering assessment and diagnostic services well after the pandemic is over.

The 2020 Annual Clinic Coordinator Meeting was held via Zoom on September 15th. The advantages of virtual meetings are obvious for those who have to travel long distances to attend a face to face meeting: less time away from other commitments; easier child care arrangements; costs savings; enables more coordinators to attend; shorter meeting. However, in person meetings have obvious benefits of connecting and networking with others during lunch and other breaks during the day and to have a targeted time away from the office, with no distractions. We'll survey coordinator's to see if virtual modes were positive ways to connect.

The Rajani Clinic Training Project continues to develop relevant resources and training. Top of the list will be a webinar this fall for those planning on using the University of Washington Facial Analysis software to measure sentinel facial features. As you can appreciate, the program is not easy to navigate and we want to ensure the training session will prepare those attending to move forward with confidence in using the software.

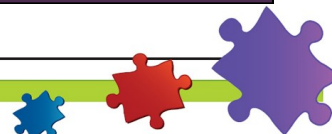

"Be kind, be calm and be safe". (Dr. Bonnie Henry)

FASD Day Highlights

Lakeland Centre for FASD (LCFASD)

This year, LCFASD held a poster campaign blitz, set up awareness booths with training in a number of communities, endorsed radio spotlights and had local artist create informative window art. One of the most creative and fun events was our first virtual mocktail challenge for FASD Day. The winning drink was chosen based on originality, and how tasty it looked, considering we couldn't gather to taste test the mocktails. Winners received a prize pack from some local businesses around the Lakeland!

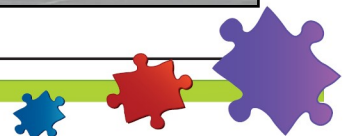

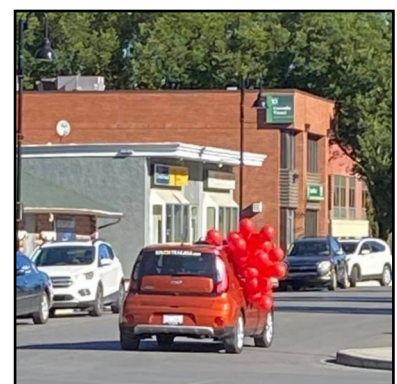

Prairie Central FASD Association

Prairie Central FASD Association had many awareness activities throughout September. Brown paper liquor bags had FASD prevention messaging and we partnered with Highway 9 to distribute the bags to liquor stores across the region. We did media messaging through social media posts, partnered with radio stations to deliver FASD public service announcements, and purchased air time to run prevention ads. On September 9th, Camrose and Wainwright Boston Pizza offered complimentary mocktails to expectant mothers. Our Education and Awareness Facilitator, Jen Willes, presented to home visitation families on the Louis Bull Cree Nation. FASD awareness messages were included in church bulletins for many churches in and around Camrose, and the church bells at the Two Hills Fellowship Chapel were rung at 9:00am.

Foothills Fetal Alcohol Society

Wearing our red shoes, we delivered 99 red balloons to businesses in High River. After the balloons were delivered, we hosted our 2nd Annual Office Chair Relay Races. Due to COVID, we only had 4 teams compete, but it was a lot of fun. It was an awesome day and event.

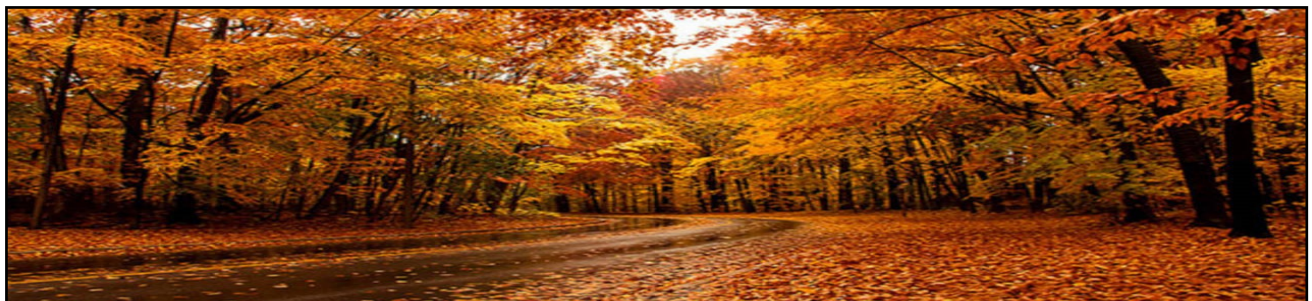

Affect Regulation Survey Results

Affect Regulation (AR) Screen, Assessment and Diagnostic Checklist for Pediatric FASD Clinics

In Fall of 2019, Alberta Pediatric FASD clinics were asked to provide information on how they assess the AR domain. Along with the checklist, links to recommended screening tools and diagnostic criteria for AR disorders were shared. Highlights from the responses:

- 6 Pediatric clinics participated; 101 individual checklists total submitted.
- Clinic dates ranged from September 2019 to August 2020.
- Child age range – 5 years to 18 years; 36% female, 64% male.
- 15 children were diagnosed with an AR impairment prior to clinic; 15 children received an AR diagnosis at current clinic.
- 4 cases where a child received an AR diagnosis at clinic, and the AR domain was the 3rd domain, resulting in an FASD diagnosis.
- AR diagnoses assigned prior to, or at clinic, include: Major Depressive Disorder, Persistent Depressive Disorder, Disruptive Mood Dysregulation Disorder, Agoraphobia, Social Anxiety Disorder and Generalized Anxiety Disorder.
- Reg. Psychologist assigned the AR diagnosis (59%), Physician (31%), and Other (10%).
- Screening tools identified as used: SCARED (15%), PSC-17 (13%), Columbia Depression Scale (10%), Preschool Anxiety Scale (2%)
- Other Screening Tools commonly used: BASC-3, CDI-2, BDI-2, MASC-2, RCMAS-2, BRIEF-3.
- Many responses indicated no screening tools were used to assess for AR impairment, reporting their team did not feel it was relevant to assess the AR domain (40% of responses).
- Using screening tools often resulted in increased referrals for interventions (40% of responses).

We encourage the pediatric clinics to complete the checklist. This information will inform practices used to screen and assess this domain.

Annual Clinic Coordinator Meeting September 15, 2020

On September 15th, the annual FASD clinic coordinator meeting was held via a Zoom meeting. This was the 10th year of the annual meeting, and keeping pace with other years' great attendance, saw 30 people connect. Face to face meetings allow participants to network with others over breaks and lunch, but a virtual meeting was more economical, involved less travel time, and resulted in a shorter meeting. Guest speakers delivered relevant information for attendees: Melissa Tremblay, Ph.D. presented on Respectful Engagement with Indigenous Communities. Dr. Hasu Rajani, Pediatrician, presented information on Affect Regulation Screening, Assessment and Diagnosis-Considerations for FASD clinics. The Rajani Clinic Training Project is planning more events and training sessions over the next months, in light of increased use of virtual platforms to deliver services, and requests for training on use of the University of Washington Facial Analysis Software to measure sentinel facial features. Please reach out to us if you have specific training requests.

List of Control Key Shortcuts

Ctrl+A These two keys will select all text or other objects.

Ctrl+B Bold highlighted text.

Ctrl+C Copy any selected text or another object.

Ctrl+D Bookmark an open web page or open font window in Microsoft Word.

Ctrl+E Center text.

Ctrl+F Open find/replace window in Excel, Word and webpages.

Ctrl+I Italicize text.

Ctrl+K Create a hyperlink for the highlighted text in Microsoft Word and many HTML editors.

Ctrl+M Indent selected text in word processors and other programs.

Ctrl+N Create a new page or document.

Ctrl+O Open a file in most programs.

Ctrl+P Open a print window to print the page you're viewing.

Ctrl+R Reload page in browser or right align text in a word processor.

Ctrl+S Save the document or file.

Ctrl+T Create a new tab in an Internet browser or adjust tabs in word processors.

Ctrl+U Underline selected text.

Ctrl+V Paste any text or another object that has been copied.

Ctrl+W Close open tab in a browser or close a document in Word.

Ctrl+X Cut selected text or another object.

Ctrl+Y These keys will redo any undo action.

Ctrl+End Moves cursor to the end of a document instead of end of the line.

Ctrl+Z Pressing these two keys will undo any action.

Ctrl+Esc Open the Windows Start Menu.

Ctrl+Tab Switch between open tabs in browsers or other tabbed programs.

Ctrl+Shift+Tab will go backwards (right to left).

On-line Training, Webinars & Conferences

CanFASD NEW Webinar:

Refreshing our Conversations About Alcohol as a Key Component for FASD Prevention.

Dr. Nancy Poole and Lindsay Wolfson.

September 25, 2020, at 11:30 am – 12:30 pm ET (9:30 am – 10:30 am MDT).

Link to register [here](#).

CanFASD On-line Training: <https://canfasd.ca/online-learners/> - elearning-2

The following courses are being offered at NO COST to Albertans:

Level I: Basic FASD Training

Level I: FASD for School Staff

Level II: FASD for Judicial and Legal Professionals

Level II: FASD for Solicitor General Professionals

Level II: Practical Strategies for the School Environment

Stay Tuned:

Rajani Clinic Training Services Upcoming Webinar:

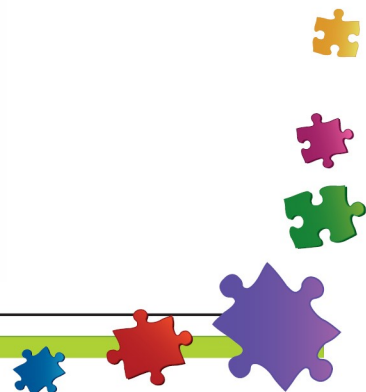

Facial Analysis Software Virtual Information Session

Fall 2020 (Date To Be Determined)

Coordinators interested in attending this webinar MUST purchase and install the software prior to the training date. The training is interactive and hands-on, providing guidance on how to analyze photos during live demonstration and practice sessions.

Click on the following for information on computer and digital camera specifications, and a link to purchase the software: [TIPS Sheet: U of W FAS Facial Photographic Analysis Software](#)

***Note:** The Northwest Regional FASD Society - Mackenzie Network has decided to postpone their Conference originally planned for this fall, until further notice.

CanFASD Research Network - Publications and Research:

FASD clinics across Canada participated in the National Assessment Measures Survey. The results of this survey have been recently published. Here is a link to the online abstract:

[A Survey of Measures Used to Assess Brain Function at FASD Clinics in Canada.](#)

[1 in 25 Canadians have this disability, and it can be prevented.](#) (PDF printable version: News Release August 27, 2020).

[Canada FASD Research Network's Commitment to Indigenous Partnership, Reconciliatory Research, and Action](#) (April 2020).

FAMILIES FACING COVID-19

PERSPECTIVES FROM CAREGIVERS OF INDIVIDUALS WITH FETAL ALCOHOL SPECTRUM DISORDER

We would like to hear about how you and your family are coping in these uncertain times!

Participation in this research study involves an online survey that takes 15-30 minutes to complete.

You are eligible if:

- You are the caregiver (parent or legal guardian) of a person with fetal alcohol spectrum disorder (FASD)
- You live in Canada
- You are able to read and write in English
- You have access to a device with internet connection

UNIVERSITY OF CALGARY

This study was approved by the University of Calgary's Conjoint Faculties Research Ethics Board. Ethics ID: REB20-0737

Contact: enhancelab@ucalgary.ca

Coordinators please forward to caregivers who may wish to participate in this study. Visit the Families Facing COVID-19 website and click on the 'Participate' button at the top right hand side of the page. <https://www.familiesfacingcovid19.com/>
